

# Subscription Management Module (SMM) for

... web driven nuclear science

# The aims of the SMM

- ✓ To manage new subscriptions, upgrades, subscription renewals
- ✓ To alert administrator about updates
- ✓ To alert users about their status, remind them about end of subscription
- ✓ To automatize the subscription processes
- ✓ To provide on-line subscription status of specific/all user(s) to the administrator

## New subscriptions, upgrades, subscription renewals

- All subscription information has to be recorded and can be accessed by the Admin
- Subscriptions to paying modes lead to automatic generation of paperwork to be emailed (full/half automatic) to ITU administration and to alerts to the Admin
- Window of subscription status with search and ordering features required

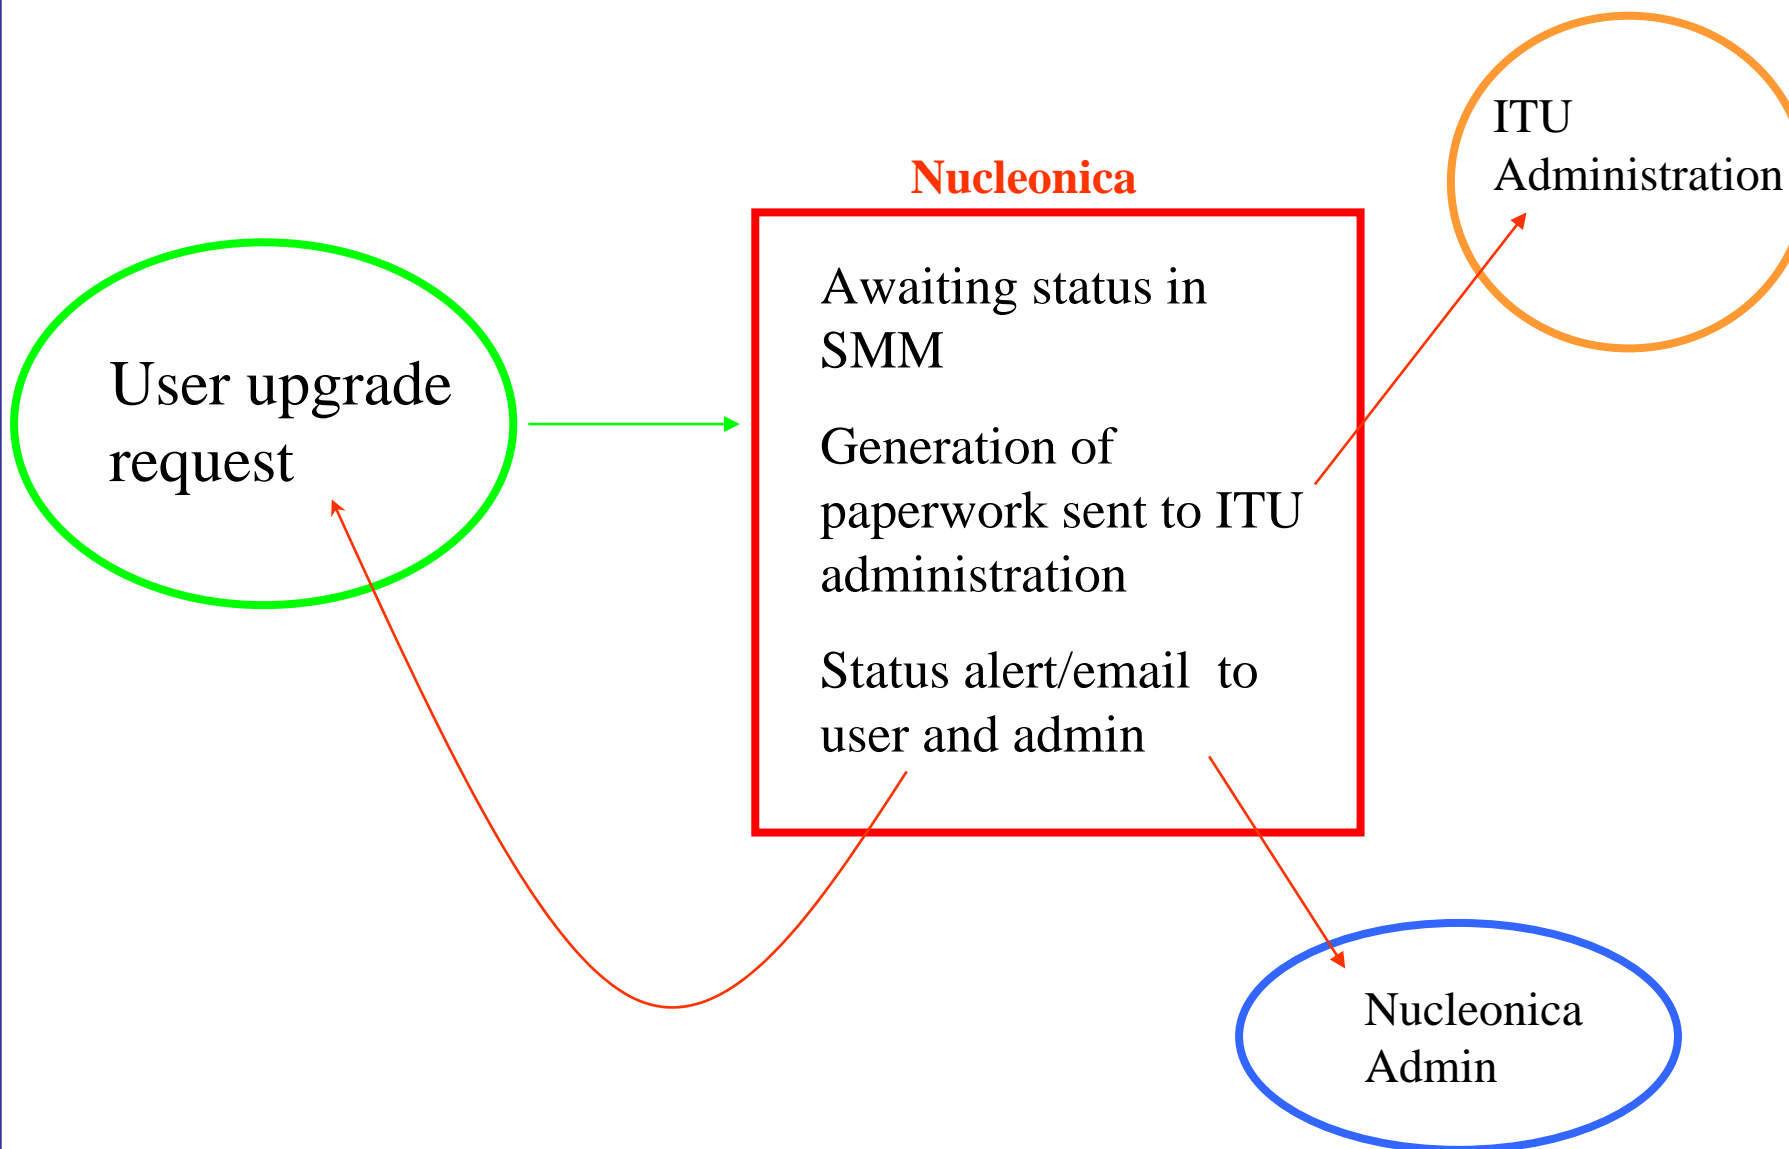

# Alerts about registration/upgrades

- ✓ Each status change is acknowledged to the user by alert AND email
- ✓ Awaiting upgrades highlighted in windows status
- ✓ Admin alerts
- Automatic reminder (~2 months in advance) to user about his end of subscription /
- Renewal of subscription automatic process similar to upgrade or automatic downgrade to free access with email acknowledgement
